Over 23 years of experience in sales, business consulting, and project management.

Ex-Head of a Financial services startup (UK)
Ex-Vice Innovations Agency

ALEXANDER LITVINOV FOMINSKI

CCO

Over 17 years of Industry experience in Game Design and creative leadership positions.

Ex-Lead World Designer at Neon Giant
Ex-Lead Designer at Wargaming

SERGEY SITNIKOV

TECHNICAL ADVISOR PARTNER

Over 21 years as a generalist Software Engineer across multiple development disciplines.

Senior Programmer at Ninja Theory
Ex-Lead Programmer at Jagex

LCG is based in Europe, and is founded by professionals with a wealth of experience spanning business, creative & technical aspects of running a successful gamedev studio.

Strategy

VISION

Our goal is to make **AA Action games** with layered **gameplay** appealing to a wide audience that craves for experiences that are **more engaging, deep and less repetitive** than most offerings on the market.

VALUES

MISSION

ENGAGEMENT TRIFECTA.

Design layered gameplay that engages the player on **mechanical, emotional** and **intellectual** levels, and makes them want to play for just another minute.

SYSTEMS-DRIVEN HYBRID GAMEPLAY. Scalable, layered, and engaging gameplay over an Action core, that ensures broad and lasting appeal while controlling costs.

Thesis

PROBLEM→SOLUTION

Boredom-inducing **repetitiveness** and **lack of depth** in gameplay are the most common and critical issues afflicting many games.

Engagement Trifecta and Systems-Driven Hybrid Gameplay are designed to solve them.

AA: GOLDEN MIDDLE

PRODUCTION VALUES

Appealing to mainstream audience.

BROAD MARKET APPEAL

Core gameplay resonates with key market demographics.

FOCUS & EFFICIENCY

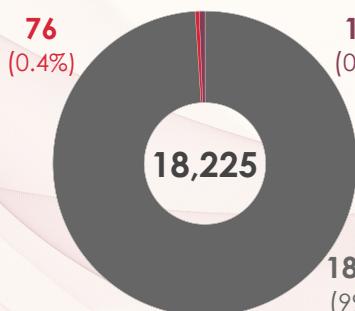

Avoid wasteful content, prioritise impactful experiences.

FLEXIBILITY & ADAPTABILITY

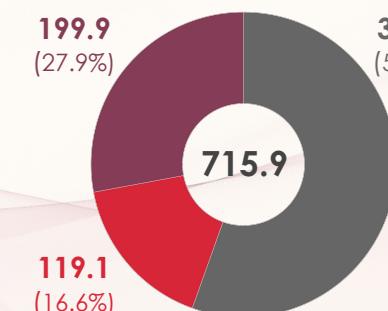

Gameplay systems over rigid, scripted, bloated content.

AA games combine commercial viability with lower production costs, making them a high-return investment.

Game Concept

Game Overview

Isles of Contest (IoC) is a hybrid **Roguelite Hack-n'-Slash ARPG** focused on deep, tactical, skill-based melee and ranged combat against hordes of enemies, while strategically leaping between the tops of living, floating islands - Eldren. Survive to Win. Win to Survive.

Core Gameplay Loop

- **Overguard Combat (USP):** A mastery-driven system of *aggressive survival* that removes the safety net of free movement, demanding precision in both defence and attack.
- **Eldren Shepherd (USP):** The player commands Eldren—living skybound entities that carry the Hero and shape the battlefield. Proper positioning maximizes their auras and attacks, ensuring survival and resource flow.
- **Ability Deckbuilding:** Players compose a deck of ability cards, drawn dynamically, to cover their Hero's weaknesses, amplify strengths, and trigger unique, game-changing effects.

Lore

Fallen heroes are brought back to life by a mysterious divinity, Elith, who seeks their aid in helping her escape this world. As the party embarks on a journey, carried by a flock of Eldren, the true nature of their past and motivations begins to unravel.

Meta Loop

- **Complete Playthrough:** A run consists of multiple survival scenarios, with the player strategically choosing the next one based on risk, rewards, and playthrough status, leading to a final challenge.
- **Tactical Progression:** Players shape their hero's build over the course of a run, making the best of available opportunities while responding to evolving circumstances.
- **Persistent Unlocks:** Some resources and upgrades carry over between runs, permanently improving heroes, ability decks, and Eldren.

Production & Viability

i Quick Facts

- **Production values:** 3rd-person camera, stylised 3D visuals, voice-over narration
- **Monetisation:** Premium GaaS, base price of \$24.99-\$29.99 + free & paid DLC's.
- **Platforms:** PC (Steam) + PS5 on launch, other platforms to follow
- **Timeline:** 16-month production (incl. pre-production), 6-month Early Access, 2-month closed Beta for a total of 24 months to launch.
- **Target Audience:** PC and console players who enjoy skill-based action RPGs with deep combat mechanics and high replayability.
- **Publishing:** Publisher deal for QA, marketing, and platform support (no funding).

Competitive Advantages

- **AA Production Values & Feasibility:** reduced scope (no large 3D traversal) and scalable design lower risk and production costs, making IoC viable under a modest budget.
- **Deep Combat System:** Going beyond typical ARPG or Roguelite offerings, thus appealing to a wider audience and greatly delaying the onset of repetitiveness.
- **USP's & Hybrid Gameplay:** IoC's unique mechanics deepen mastery & replayability, distinguishing it from typical ARPGs and Roguelites.

Risks & Mitigation

- **Marketing.** Discoverability & Player Appeal.
 - Internal. Dedicated Engagement Lead, social media, Discord, streaming platforms.
 - Publisher. Professional media exposure, gaming shows, trailer, platform features.
- **Balancing.** Gameplay experience failing to meet players' expectations.
 - Tools. Purpose-built in-engine and in-game balancing tools.
 - Key Metrics. Standardised criteria for tuning.
 - Testing. Auto-tests, focus groups, QA and Early Access.
 - Updates. Streamlined balance updates pre & post-launch.

Financials

Budgeting

€1.2M

24 months

7 people

Cost	→ Early Access	→ Launch
Salaries	€500K	€800K
Outsourcing	€65K	€100K
Operations	€65K	€100K
Contingency	€120K	€200K
Total	€750K	€1.2M
Runway	16 months	24 months

Projected Performance

	Units	Revenue	Penetration
Aggressive	6.0M	\$150M	5.24%
Optimistic	2.0M	\$50M	1.75%
Conservative	500K	\$12.5M	0.44%
Break-Even ¹	~125K	\$3.15M	0.11%

- Avg. burn rate: €37.5K/month
- Post-launch monetisation & external funding (EA, publisher, 1st party deal) will support studio growth.
- A **large target audience** (SAM² of ~114.6M players) ensures that even conservative market penetration is financially appealing.
- AA production at **½ the usual cost** results in lower financial risk.

¹ Based on estimated platform, publisher, licence, VAT, etc. fee values

² Open-source and VG-Insights data has been used as foundation for market opportunity analysis.
